

EXTREME AND DANGEROUS HEATWAVE IN AUSTRALIA

Valid: From December 07, 2025 to December 09, 2025.

Affected Areas

Australia

Hazard Type

Extreme Heatwave

Hazard Summary

Temperatures already 40–45 °C across inland NSW, Queensland, South Australia and Northern Territory, with western Sydney suburbs hitting 43 °C+ today (7 Dec).

The heat dome will further strengthen tomorrow and Monday (8–9 Dec), pushing 45–48 °C in central and eastern Australia-many locations heading for all-time December records.

Sydney, Brisbane, Adelaide and Melbourne fringes to see 38–44 °C with no overnight relief. Extreme bushfire danger and fire.
