## FREEZING RAIN WARNING CANADA

### Affected Areas

Quesnel, Prince George, Hixon, Penny, Quesnel, Kersley

### Duration

January 14-15, 2025

### Hazard Types

**Freezing Rain:** A frontal system is moving into interior BC tonight and on Tuesday. Periods of mixed precipitation with a risk of freezing rain are expected over central interior regions as surface temperatures hover near 0 degrees Celsius.

### Hazard Summary

The freezing rain risk will diminish early morning over Stuart - Nechako, and continue to late morning for the rest of the regions. Surfaces such as highways, roads, walkways and parking lots may become icy and slippery. Take extra care when walking or driving in affected areas. Be prepared to adjust your driving with changing road conditions.
