Blizzard & Snowfall Warning

Canada

Countries: Canada

Hazard Type: Blizzard & Snowfall Warning

Intensity: Moderate to Heavy

Expected Time of Occurrence: 22th – 24th January 2025

Summary of Conditions:

Snow squalls producing blizzard-like conditions are expected. Additional snowfall: locally 5 cm where snow squalls set up and are most persistent. Maximum wind gusts: westerly 40-50 km/h. Locations: Burgeo-Ramea to the Connaigre Peninsula. Time span: ending later this morning. Snow squalls cause weather conditions to vary considerably; changes from clear skies to heavy snow within just a few kilometres are common. Travel may be hazardous due to sudden changes in the weather. Snow squall watches are issued when conditions are favourable for the formation of bands of snow that could produce intense accumulating snow or near zero visibilities.
