

January 08, 2025

## Global Alerts - East Zone

### Cold wave - Korea

#### Affected Areas

Regions experiencing rapid temperature drops

#### Duration

January 8-9, 2025

#### Hazard Types

**Extreme Temperature Drops:** Morning minimum temperatures falling by over 15°C compared to the previous day, dropping below 3°C, and 3°C lower than the climatological norm

#### Hazard Summary

A severe cold wave is expected to bring extreme low temperatures and rapid drops in temperature across wide areas. These conditions pose risks to health, agriculture, infrastructure, and daily life.
