

## Winter storm warning

### North Coast - inland including Stewart Canada

**Countries:** Canada

**Hazard Type:** Winter storm & Snowfall

**Intensity:** Moderate to Heavy

**Expected Time of Occurrence:** 23<sup>th</sup> – 24<sup>th</sup> January 2025

#### **Summary of Conditions:**

A snowstorm is expected.

Where: North Coast - inland including Stewart, McGregor, Williston and Pine Pass.

When: Now through this evening.

**Hazards:** Rapidly accumulating snow could make travel difficult. Visibility may be suddenly reduced in heavy snow. Remarks: A frontal system moving onto the north coast is spreading snow at times heavy over North Coast inland sections today. Snowfall amounts of 25 to 35 cm can be expected near Stewart by this evening. The snow will taper off overnight as the front moves to the south. Surfaces such as highways, roads, walkways and parking lots may become difficult to navigate due to accumulating snow.
