## Turkey Weather Alert – Widespread Snow & Cold Conditions

Valid: 2 weeks (from 06 January 2026)

### Affected Areas

Widespread across Turkey, with snow warnings and advisories for up to 63 provinces, particularly affecting Central Anatolia, Eastern Anatolia, the Black Sea region, and interior western provinces, including urban centers and elevated areas.

### Hazard Types

Snowfall (moderate to heavy at times), severe cold weather, ice formation and frost, hazardous travel conditions, and reduced visibility.

### Hazard Summary

Snowfall reported across large parts of Turkey and advisories covering 63 provinces (GZT). These conditions have led to icy roads, travel disruptions, and increased cold-related risks. Forecasts indicate another round of snow may occur later this week or over the weekend in parts of the country. Residents are advised to remain alert, follow official warnings, and limit non-essential travel during hazardous conditions.
