## UK Severe Weather Alert – Snow & Ice

Valid: 2 weeks (from 05 January 2026)

### Affected Areas

Northern and eastern Scotland (including Highlands and Grampians), parts of Northern Ireland, central and eastern England (Midlands to eastern counties), with localized impacts in Wales and southwest England.

### Hazard Types

Snowfall, Ice, Reduced Visibility, Disruptive Winds

### Hazard Summary

Cold air combined with strong winds is producing areas of snow and wintry precipitation, mainly across Scotland and parts of central to eastern England. Accumulating snow is likely on higher ground, with icy conditions developing widely. Travel disruption is possible, especially on untreated roads, with reduced visibility during heavier snow bands.
