

## Heavy Snowfall in Japan

Valid: (14 January 2026 Active)

### Affected Areas

Japan coast, particularly in Hokkaido, Tohoku, and Hokuriku

### Hazard Types

Heavy Snowfall

### Hazard Summary

Ongoing snowfall is affecting several regions, leading to cold conditions and reduced visibility.

Accumulating snow may cause **hazardous road conditions**, travel delays, and disruptions to rail and air services.

Strong winds in some areas could result in blowing snow and near-whiteout conditions.

Residents and travelers are advised to drive cautiously, keep warm, and follow local weather and safety advisories.
