## Active Wildfire Situation in Southern Argentina (Patagonia)

### Affected Areas

Epuyen and surrounding areas, Chubut Province, Patagonia – Argentina

### Hazard Types

Wildfire / Forest Fire

### Hazard Summary

An active wildfire is ongoing in the Epuyen area of Chubut Province, southern Argentina. Dry weather, high temperatures, and gusty winds are supporting continued fire spread across forested areas. The situation poses risks to nearby communities, infrastructure, and air quality due to smoke. Firefighting operations are underway, while conditions remain favorable for sustained fire activity. Impacts are expected to be moderate at local scale
