

## Wild Fire Vancouver Island, British Columbia

### Affected Areas

Vancouver Island, British Columbia

### Duration

August 3<sup>rd</sup> 2025

### Hazard Types

Wild Fire

### Hazard Summary

An out-of-control wildfire near Nanaimo, Vancouver Island, has prompted mandatory evacuations for hundreds of homes. The blaze is spreading rapidly due to dry conditions and thick smoke, hampering firefighting efforts on the ground and from the air. Avoid the affected area to allow emergency crews access. Follow all evacuation orders and instructions from local authorities. Prepare for poor air quality; residents in surrounding areas should limit outdoor activity.
