

Flood Warning Australia

Location: Australia

Hazard Type: Flash Flood

Intensity: Moderate to Heavy

Expected Time of Occurrence: 6th – 11th February 2025

Hazards: A **Flash Flood Warning** is in effect for several areas due to intense rainfall and rapidly rising water levels. Heavy downpours are leading to dangerous flash flooding, with conditions expected to persist.

Key Impacts:

- Rapid water level rises in creeks, streams, and low-lying areas.
- Roads may become impassable due to flooding.
- Increased risk of landslides in hilly or mountainous regions.
- Possible evacuations in flood-prone zones.

Safety Precautions:

- Avoid travel unless absolutely necessary.
- Never attempt to walk, swim, or drive through floodwaters.
- Seek higher ground immediately if you are in a flood-prone area.

Remember: Flash floods develop quickly and can be life-threatening. Stay alert and take immediate action to ensure your safety.
