

## Heavy Rainfall - ASEAN Countries

### Affected Areas:

- **Vietnam:** Central and southern regions.
- **Malaysia:** East coast of Peninsular Malaysia (Kelantan, Terengganu, Pahang).
- **Thailand:** Southern regions, especially along the Gulf of Thailand.
- **The Philippines:** Eastern and central regions, particularly Visayas and Mindanao.

**Duration:** December 27th to January 2nd.

### Hazard Types:

- **Flooding:** Urban, flash, and riverine flooding in low-lying and coastal areas.
- **Landslides:** In hilly and mountainous terrain.

Heavy rainfall from December 27th to January 2nd is expected to impact **Vietnam, Malaysia, Thailand, and the Philippines**, causing **flooding, landslides, and rough seas**. Low-lying and coastal areas face flooding risks, while hilly regions are prone to landslides. Coastal zones, especially along the **Gulf of Thailand, east coast of Malaysia, and eastern Philippines**, will experience rough seas, posing dangers to small boats. Residents should stay vigilant and follow local advisories.
