Global Alerts – West Zone

Germany: Adverse winter weather forecast

Affected Areas

Worbis, Goslar, Kassel, Brilon, Siegen

Duration: January 8-10, 2025

Hazard Types

Heavy Snowfall

Hazard Summary

**Government of Pakistan
National Disaster Management Authority
Prime Minister's Office Islamabad**

Mix of rain, snow, and sleet is expected across southern parts of the country Jan. 9, with heavy snowfall likely in mountainous areas and thunderstorms possible in places. Persistent rainfall is forecast in isolated pockets of southwestern and western Germany and strong winds are likely in northern regions. A broad swath of snow is expected to move eastwards over the center of the country late Jan. 8-9. Sleet, snow, hail, and gusty winds are forecast in eastern and northern regions Jan. 10, as well as snowfall in south eastern regions. Hazardous travel conditions are likely due to reduced visibility and slippery roads.
