

## Flood - Philippines

### Affected Areas

Apayao, Ifugao, Benguet, Mountain Province

### Duration

July 28-29, 2025

### Hazard Types

Monsoon-Induced Flooding

### Hazard Summary

Heavy rainfall from the Southwest Monsoon may trigger flooding and landslides in mountainous and low-lying areas of northern Luzon. Rivers and tributaries in Apayao, Ifugao, Benguet, and Mountain Province are at risk of overflowing. Extreme caution is advised.
