

Heavy Rainfall in China

Affected Areas

Harbin, Suihua, Daqing China

Duration

July 28- 30 July 2025

Hazard Types

Heavy Rainfall/Flooding

Hazard Summary

Severe weather alert: Heavy rainfall and scattered thunderstorms are expected across Heilongjiang province, including cities such as Harbin, Suihua, and Daqing. The strongest precipitation is centered in the regions highlighted in red and orange on the map. Localized flooding may occur due to the intensity and duration of the rainfall. Residents should avoid unnecessary travel and stay tuned to local weather updates. Take measures to protect property and ensure personal safety.
