

Tropical Storm (Krosa) - Taiwan

Affected Areas

Northern Mariana Islands, Okinawa, Taiwan

Duration

July 25-30, 2025

Hazard Types

Strong winds, high seas, and Heavy rainfall potential

Hazard Summary

Typhoon Krosa is generating hazardous marine conditions with wave heights up to 5.8 meters and is forecast to intensify to 120 km/h over the next 48 hours. Numerical models show moderate agreement early on, with track divergence after Day 3 due to competing steering flows.
