

Flood – Australia

Affected Areas

Tasmania, Victoria

Duration

July 28-29, 2025

Hazard Types

Riverine Flooding

Hazard Summary

Flood conditions are easing across multiple river systems in Tasmania and Victoria. While flooding is no longer expected in the Coal River and levels are receding in the Break O'Day River, moderate flooding remains possible in the King River at Docker Rd Bridge. Continued vigilance is advised as water levels may still pose risks in low-lying areas.
