Global Alerts - East Zone

Extreme Heat - Australia

Affected Areas

New South Wales: Central West Slopes, Riverina, and Sydney Basin districts.

Duration

March 14-16, 2025

Hazard Types

Extreme Heat

Hazard Summary

Maximum temperatures ranging from the high thirties to mid-forties, with overnight minimum temperatures remaining in the high twenties. Heatwave conditions will persist across inland and coastal areas over the next two days, with relief expected late Sunday as a cool change moves through the region. Locations likely to be impacted include Broken Hill, Dubbo, and Sydney's western suburbs.
