It gives me immense pleasure to share present issue of the 'Resilience' which has been prepared to highlight important events, news and activities during the recent months. The issue also presents a rundown of major initiatives for preparedness to early warnings, rescue, relief and response during monsoon season-2013 and the earthquake in Balochistan on 24th September, 2013. It is indeed our mission to advance national preparedness by improving and increasing the nation's resilience to natural and man-made threats. Keeping in view the changing climatic condition and frequent recurrence of

unpredictable and extreme events, NDMA is proactively working at reducing the vulnerability to disasters, and also strengthening coping mechanisms. The disaster management system in Pakistan has come a long way in the recent years with formulation of National Disaster Risk Reduction Policy and National Disaster Management Plan but still a lot more has to be done to implement these policies and plans in true letter and spirit. We have also made considerable progress in mainstreaming disaster risk reduction in the development processes, which will undoubtedly lead to greater national resilience against potential disasters.

Our endeavours for resilience are consistent with our objectives and the well thought-out roadmap for the future in the shape of a comprehensive ten years National Disaster Management Plan. I appreciate the proactive role of all relevant stakeholders including disaster management bodies, line departments, donors and development partners, civil society and humanitarian community for contributing towards strengthening of disaster management system in Pakistan and ultimately enhancing the capacity of communities to cope with the emerging threats. Finally, let me acknowledge the hard work and commitment of NDMA's officers and staff, who have been working tirelessly towards achievement of these noble goals and ideals.

Major General Muhammad Saeed Aleem,
Chairman,

RESILIENCE

SECTION-I

MONSOON- 2013

NATIONAL CONTINGENCY PLAN- 2013: PREPARING FOR RESILIENCE

Floods have been more frequent and damaging with substantial negative impact on our economy. In order to reduce flood risks by reviewing preparedness efforts, National Monsoon Contingency Plan-2013 was undertaken in consultation with all key stakeholders at national as well as provincial levels. Based upon the lessons learnt and experiences the contingency planning processes and activities have witnessed a positive transformation. The reformation and refinement have been brought into the process of contingency planning by adopting a bottom up approach where district level authorities are encouraged via the provincial governments, to undertake respective hazard in their area and risk assessments, identify needs, plan effective deployment of available resources, prepare their own contingency plans for the likely and worst case scenarios, which are realistic, practicable and responsive to the needs of local population.

For the National Contingency Plan- 2013, NDMA initiated consultations for preparedness and contingency planning at all provincial / regional levels by suggesting the outline for contingency plans to various partners. Meanwhile, the respective PDMA/ regional DMAs steered and facilitated the process at district level wherein the district level plans were formulated by DDMA and assimilated into the provincial/ regional plans. These provincial/ regional plans were further collated into the National Contingency plan for monsoon 2013. NDMA remained engaged with the provincial governments to review and further refine their preparedness and contingency plans.

Besides analyzing the veracity of various scenarios the plan also highlighted broad triggers for action, coordination mechanisms, stock levels and financial requirement for reliefs, roles and responsibilities of various stakeholders and national capacities.

LOGISTICS SUPPORT PLAN

(Monsoon Preparedness & Contingency Planning -2013)

NDMA logistics support plan was prepared in close coordination with Response and Admin Sections. The plan mainly involved the working / calculation to determine the case load and needs and provision of critical relief stocks (tents, mosquito nets, blankets, food packs, water purification plants and tablets) etc including their carriage facilities / transportation and the overall financial impacts of each.

Standardization of NDMA Food Packs Based on International Nutrition /Caloric Value

In consultation with WFP and by drawing comparison of Food Packs / Hampers prepared by various agencies, a standardized NDMA Food Pack, matching international nutritious/ caloric values, was prepared to deliver the emergency/ disaster affectees. The NDMA website also displays contents of NDMA Food Pack.

Stocking Levels and Financial Requirements for Relief

| Likely Scenario | | | | |
|-----------------------------------------------|---------------|----------------|---------------|------------------|
| Province/Region (Vulnerable Population 5.8MM) | | | | |

PRE MONSOON PREPAREDNESS AND CONTINGENCY PLANNING AT PROVINCIAL/REGIONAL HEADQUARTERS

GB: June 19th, 2013 Chairman NDMA, Major Gen Saeed Aleem alongwith Chief Secretary GB, Munir Badiani chairing the meeting on pre monsoon preparedness & contingency plan at GB Secretariat.

Peshawar June 17, 2013: Chairman NDMA, Maj General Saeed Aleem reviewing the state of preparedness for upcoming monsoon season and contingency planning by the province of Khyber Pakhtunkhwa.

Keeping in view the multifaceted challenges of climate change and resource constraints NDMA launched provincial /regional level broad based consultation processes. These consultations were aimed at creating an understanding for multi-hazard contingency planning with specific focus on monsoon 2013. A number of high level meetings to review the state of preparedness and provincial/regional contingency plans were held at all the four provincial as well as regional headquarters to take stock of the preparedness measures, consult relevant agencies on contingency plans and resolve outstanding issues.

NATIONAL CONFERENCE ON PREPAREDNESS AND CONTINGENCY PLANNING FOR MONSOON-2013

Islamabad 26-27 June 2013: Chairman NDMA Maj. Gen. Saeed Aleem addressing during a 2 days "National Conference on Monsoon Preparedness & Contingency Planning"

NDMA as part of its annual national preparedness and contingency planning, organized a two days National Conference on "Monsoon Preparedness and Contingency Planning 2013" at National Library in Islamabad from 26th-27th June 2013. The Conference was a culmination of preparedness exercise initiated in March 2013 by NDMA whereby the provincial PDMA/SDMA/FDMA/ICT led the preparation of Contingency Plans at District and respective levels with primary focus on highly vulnerable districts / areas. The representative from Provincial/ Regional DMAs , PMD, FFC, SUPARCO, Federal Agencies, Pakistan Army , NHEPRN, ERC Cabinet Division, Pakistan Commission for Indus Waters, NHA, WAPDA, Pakistan Railways, NLC, Punjab Emergency Services, PRCS, UNOCHA and other stakeholders presented their plans.

RESILIENCE

June-December- 2013

FLOODS-2013

During the monsoon season-2013, the rain induced riverine and flash floods affected various parts of the country that included North West of Khyber Pakhtunkhwa (KP), FATA, Central Punjab, Balochistan, Karachi and the Katcha areas of Sindh. The river Chenab and its channels caused flooding and losses in Sialkot, Narowal, Sheikhpura and Jhang districts while the river Sutlej affected parts of Kasur and Okara. The river Indus affected parts of Northern Sindh. The rain induced urban flooding affected Karachi, Hyderabad and Gujranwala Divisions. There were also suspected Glacier Lake Outburst Flooding (GLOF) in Chitral and land sliding in Kashmir. However, before the start of flood season, capacity building training for disaster response of government officials and agencies in highly flood prone districts had also been undertaken.

During the whole monsoon season, NDMA kept constant monitoring of situation and orchestration/facilitation of all responses related to mitigation, rescue and relief. A total of 27 advisories for evacuations and early warnings had been issued in coordination with PMD/FFC. NDMA also prepositioned relief equipment and items on need basis. NDMA also coordinated with NHEPRN and other agencies for undertaking health interventions. In flood like situation,

NDMA also facilitated requisitioning of armed forces and air support on requirement basis. Logistics Section of NDMA dispatched the relief goods to the concerned local administrations and victims of flooded areas in the country. Relief stocks included, dewatering pumps, tents, mosquito nets and food packs to PDMA Punjab (including DCO Kalar Saidan), Balochistan and Sindh, while water boats were offered/allocated to PDMA Punjab, KP and Sindh to facilitate their rescue operations, if needed. NLC and others for logistics support were also mobilized.

OPERATIONALISATION OF NATIONAL EMERGENCY OPEARTION CENTRE (NEOC)

NEOC became operational for 24/7 on 15th July 2013 in NDMA. It functioned to optimize coordination mechanism through effective information management & coordination system. It maintained continuous liaison with all federal, provincial & district authorities, armed forces and line departments to enable effective coordination of all efforts to ensure timely response.

RESILIENCE

June-December- 2013

VISITS OF MONITORING TEAMS TO FLOOD HIT AREAS

In the wake of monsoon rains and flood like situation across the country, monitoring and reporting teams headed by Logistics Officers and Reporting & Monitoring Officers were deployed in the flood affected areas of Districts Rajanpur, Sialkot, Chitral, Sukkur, Sheikhpura & Gujranwala and coordinated relief efforts with the respective district administrations/other agencies.

CHAIRMAN NDMA'S VISITS TO FLOOD AFFECTED AREAS

Chairman NDMA, Major General Saeed Aleem along with officials of NDMA visited the flood affected areas of Peshawar, Nowshera and Charsadda in June 2013 and also visited Kasur, Narowal, Chitral, Ghotki and Larkana respectively from 21st to 26th August, 2013 followed by aerial reconnaissance of the River Chenab, Trimmu HW, Punjnad HW, Sukkur and Kotri barrages. He also visited Chitral to review the emergency response and relief efforts undertaken by the Provincial and District Administrations. During his visit Mr. Syed Javed Iqbal Bukhari (DCO Kasur), Mr. Niaz Abbasi (Commissioner Sukkur), Mr. Muhammad Shoaibullah Jadoon (DCO Chitral) and representatives of the district administration of Larkana briefed the Chairman of the monsoon situation.

PRIME MINISTER'S VISIT TO FLOOD AFFECTED AREAS

Prime Minister, Mian Muhammad Nawaz Sharif visited flood affected areas of Punjab and Sindh Provinces. The Prime Minister was briefed by Chairman NDMA and other concerned authorities regarding flood situation, damages & losses and the steps taken for the rescue and relief of the affectees. On 18th August 2013, during his visit to Flood Relief Camps in Baddomalhi, in Narowal, the Prime Minister disbursed cheques among the bereaved families of those killed in the floods. Mr Pervez Rashid (Minister for Information Broadcasting and National Heritage) Mr Ahsan Iqbal (Federal Minister for Planning Commission) and Major General Saeed Aleem (Chairman NDMA), also accompanied the Prime Minister. On 24th August 2013, the Prime Minister also visited the Flood Relief Camp at Shink Band Ghotki, Sindh. He assured cooperation of the government in providing all possible assistance for the relief and rehabilitation of flood hit people. Syed Qaim Ali Shah (Chief Minister Sindh) and other Federal and Sindh government officials were also present on the occasion.

RESILIENCE

June-December- 2013

SECTION-II THE AWARAN EARTHQUAKE 2013

RESPONDING TO THE EARTHQUAKE: PROMPT AND VIGOROUS ACTIONS

Earthquakes with a magnitude of 7.7 and 7.4 on the Richter scale jolted south-western Balochistan on 24th September and 27th September respectively. The areas of districts Awaran and Kech of Balochistan were severely affected by the earthquakes. The worst affected areas include tehsils Gashkor, Mashkai and Awaran of District Awaran and tehsil Dandar of District Kech. All national relief and rescue resources were immediately mobilized and diverted to the disaster affected area.

Losses and Damages of Awaran Earthquake – 2013

Affected Population : **200,241** Affected families at Awaran/Kech Districts : **40,000**

NDMA hosted a coordination meeting of key departments and organizations including Ministry of Foreign Affairs, Economic Affairs Division, Ministry of Communication, Climate Change Division, Military Operations Directorate, WAPDA, PMD, SUPARCO, FFC, NHEPRN, PRCS on 26th September, 2013 at NDMA, Islamabad. The aim was to coordinate relief and rescue efforts in the wake of earthquake in Balochistan to ensure continuous passage of information of damages and to devise mechanism for relief operations and coordination among key departments and organizations.

Islamabad: September 25th, 2013: Representatives of NDMA, EAD, PMD, SUPARCO, PRCS, NHA, NHEPRN, WAPDA, Foreign Affairs, MO etc. Ministry of Communication during a coordination meeting at NDMA, in wake of Balochistan Earthquake 2013

NDMA initiated coordinated activities for rescue and relief efforts by Pakistan Army, Frontier Corps, PDMA, the civil administration, the civil society and other key stakeholders in the affected areas. Pakistan Army, as usual, played a key role in provision of rescue and relief efforts and were ably assisted by Pakistan Air force, Pakistan Navy, Frontier Corps and the civil administration.

Karachi: September 27th, 2013: C-130 carrying NDMA relief stock (food packs) for air dropping in quake hit areas of Awaran

NEOC: National Emergency Operations Centre was immediately activated and all federal and provincial departments were alerted. The emergency operation center monitored & coordinated, rescue / relief activities with all national departments, provincial governments, armed forces, FC, civil society organizations and international partners round the clock.

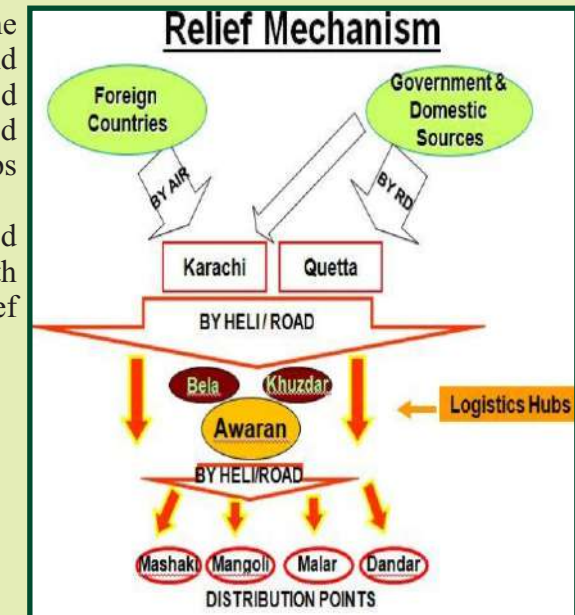

RESILIENCE

June-December- 2013

Rescue and relief operation: Soon after the earthquake, the FC Balochistan and the Pakistan Army took lead in rescue and relief operations and immediately moved troops to affected area. The Air Dispatch Company of Pakistan Army was moved from Islamabad to Karachi to prepare relief goods for air drops which extended valuable support for relief logistics.

Urban search and rescue team (USAR): NDMA moved Urban Search and Rescue teams from Karachi along with canine components to expedite lifesaving rescue and relief activities.

| Search & Rescue (24–27 Sep'13) | | |
|--------------------------------|----------------------------|------------------------------|
| Rescue Effort | Army Deployed | 4 Army units 1 x FC wing |
| | USAR Team Deployed | 39 x individuals 4 x dogs |
| | Local admin and volunteers | Unspecified number |

Establishment of NDMA Logistics Center/Coordination Network - Awaran Earthquake

To ensure planned and sustained logistic support, NDMA established a "Logistics Center" as forward NDMA logistics base by deploying a segment of its Logistics Section at COD Karachi and Islamabad and three sub offices at Awaran, Bella, Khuzdar to coordinate the relief activities with the District Administration and the Army to keep fast track of logistic support/efforts (relief operation) towards the affected areas of Awaran.

Dispatch of Relief Items to the Earthquake Affected Areas.

A substantial dispatch movement of relief stocks was carried out by NDMA Logistics Section to the earthquake affected areas of Awaran. Main logistics support/effort was initiated from "NDMA Forward Logistics Center" at COD Karachi, however, some of the NDMA relief stocks prepositioned at Quetta and Islamabad/Rawalpindi warehouses, were also directed to Awaran directly or via COD Karachi.

Member S&S along with Log Manager inspecting dispatch of relief stock at COD Karachi.

Field hospital at Awaran & Medical Support: Pakistan Army immediately established its field hospital at Awaran to provide much needed medical support. A number of military and civil hospitals along with ambulances were engaged in rescue and relief efforts.

| Medical Evacuation | Evacuated to Karachi | | 335 (critically injured) |
|--------------------|----------------------|------------|--------------------------|
| | Total treated | | 30,962 |
| | Doctors | Paramedics | Ambulances |
| Awaran | 28 | 53 | 34 |
| Mashkai | 18 | 10 | 3 |
| Dandar | 6 | 8 | |

Financial Assistance: The Prime Minister, Nawaz Shrief immediately sanctioned rupees 100m to NDMA for provision of relief to the affected population.

Provision of Relief: NDMA provided 12,570 tents, 20,000 food packs to the affected population utilizing NLC, PDMA Balochistan and Armed Forces of Pakistan. 34 sorties of C 130 / IL76 were flown from Islamabad to Karachi and for subsequent air drops.

| Air Assets Committed | Air Sorties Flown | |
|----------------------|---------------------------|----------------|
| | Pak Army | 14 helicopters |
| PAF | 2 C130s, 1 IL 76aircrafts | |
| PAK Navy | 1 Fokker and 1 helicopter | |
| Punjab Government | 1 helicopter | |
| | 5 sorties | |

The large scale air effort was employed in support of the earthquake relief operation which included air assets of Pakistan Army, Pakistan Air Force, Pakistan Navy, FC Balochistan and the Government of Punjab.

EARLY RECOVERY PLAN

After the successful rescue & relief operations, NDMA coordinated the 'Initial Rapid Assessment' of damages and losses in Awaran earthquake affected area of Balochistan. The assessment was jointly undertaken by Civil Administration and Pakistan Army teams. The purpose of the exercise was to identify the scale, extent and nature of losses in terms of lives, livelihood, property and infrastructure so as to ascertain the additional resources for early recovery and rehabilitation of affected population. NDMA prepared an 'Early Recovery Plan' by proposing various interventions and provision of additional resources in the sectors of food, shelter, education, livelihood, agriculture/irrigation, community/ services restoration etc. The Early Recovery Plan was submitted to Climate Change Division on 29th October 2013. The salient features of the plan are:-

- Provisioning of food items to the affected population for a period of three months.
- Provision of 970 large sized tents and necessary wherewithal to ensure health and education facilities and government buildings are up and running in the shortest possible time.
- Provincial Government with the support of Federal Government cater for livelihood and community/ services restoration.

The civil society and business community also extended support in provision of relief assistance for earthquake affected population by providing large quantities of food, shelter and other necessities. The Prime Minister while on his visit to Awaran on 8th November, 2013 commended the relief efforts of NDMA, Balochistan Government and Pakistan Army, and directed the Government of Balochistan to take lead role in reconstruction. He also approved construction of 30,000 two-room units for earthquake affectees of Balochistan at an estimated cost of Rs 7.5 billion to be shared equally by the Federal & Provincial Governments.

REVIEW OF EARTHQUAKE RELIEF EFFORTS BY THE GOVERNMENT

On the directions of the Prime Minister Muhammad Nawaz Sharif, Interior Minister Chaudhry Nisar Ali Khan chaired a high level meeting in Islamabad on 30th September 2013 to review the Balochistan earthquake relief work. Chairman NDMA, DG ERRA, Chairman National Database and Registration Authority (NADRA) and senior officers of the Prime Minister's Office attended the meeting. Chairman NDMA informed the meeting about the damages and rescue relief efforts of the Pak Army, the FC and the Civilian Administration who worked round the clock to alleviate distress of the affectees.

SECTION-III CAPACITY BUILDING INITIATIVES

CAPACITY BUILDING TRAININGS – VULNERABLE DISTRICTS

NDMA, in collaboration with UNOCHA and respective PDMA, organized capacity building trainings for the district authorities of vulnerable districts in 2013. The aim of these trainings was to enhance the response capacities of district and provincial authorities and increase their understanding of humanitarian issues. In phase 1, officials of 43 vulnerable districts of Punjab, Sind, KP, Balochistan and AJ&K and selected officers of Pakistan Army and NGOs were imparted training. In the second phase 18 training sessions at 33 districts have been organized for year 2014.

Participants of Capacity Building Workshop at Nasirabad, Balochistan.

TRAININGS FOR NATIONAL WORKING GROUP ON VULNERABILITY AND RISK ASSESSMENT

NDMA in collaboration with the World Bank (WB), organized a series of trainings from 1st to 12th July, for the members of National Working Group (NWG) on Vulnerability and Risk Assessments, at Islamabad. These trainings were part of the WB's technical assistance to NDMA to create a national platform for risk assessments, which brings together a number of Pakistan's technical agencies to collaborate under one umbrella. The participants of the training course represented various government departments and agencies, including NDMA, PDMA, GSP, SUPARCO, PMD, ERRA, NESPAK, as well as academia.

Islamabad: July 12th, 2013: Chairman NDMA, Major General Saeed Aleem addressing the participants of the National working group on vulnerability and risk assessment training organised by NDMA in collaboration with World Bank

NATIONAL INSTITUTE OF DISASTER MANAGEMENT (NIDM) ESTABLISHED A STEP TOWARDS MAKING PAKISTAN DISASTER RESILIENT

NDMA was assigned the responsibility of establishing NIDM which was a statutory requirement under NDM Act 2010. The NIDM, through the technical support of the United Nations Development Program (UNDP) was established in Islamabad in February 2010 to build capacities to respond and prepare for disasters across the country but due to financial constraints, the institute was temporarily closed. However under the guidance of Major General Muhammad Saeed Aleem, Chairman NDMA, the present team (Brig Sajid Naeem and Capt (R) Asif Iqbal Asif) revitalized the institution in July 2013, with a mission to work as a learning center for the government officials, private sector, media, NGO and enhance their capacities through research and training. NIDM was formally inaugurated by Chairman NDMA on 5th August 2013.

NDMA & THE WORLD BANK LAUNCHED BASELINE DATA COLLECTION FOR RISK ASSESSMENT FOR PAKISTAN

NDMA, in collaboration with WB started a project on 15th August 2013 to conduct a historical research & maintain data base on the occurrences, impact and losses of disasters that occurred in Pakistan between 1980 and 2013. The WB is assisting the project through technical assistance and providing data analysts at provincial/regional disaster management authorities for data collection and data specialists at NDMA.

MULTI SECTOR INITIAL RAPID ASSESSMENT (MIRA) TRAININGS- 2013

Islamabad 20th August 2013: NDMA & UN-OCHA jointly conducted Multi Sector Initial Rapid Assessment (MIRA) training 2013 in Islamabad, to develop better understanding of the questionnaire among the participating, for field assesment on community level.

NDMA and UN-OCHA, in July 2012, jointly devised a tool called Multi Sector Initial Rapid Assessment (MIRA) for assessing the severity of a disaster. The tool was piloted in five flood affected districts namely Jaffarabad, Naseerabad, Rajanpur, Jacobabad and Kashmore in September 2012. In 2013, NDMA further refined this tool by revisiting the Questionnaire and setting up Joint Assesment Roster. NDMA and UN-OCHA jointly conducted training sessions on MIRA at Islamabad, Karachi, Peshawar, Quetta, Multan, Nasirabad and Sukkur from 20-22 August, 2013 respectively.

HUMANITARIAN RESPONSE FACILITIES (HRFS) & FLOSPANS INITIATIVES

HRF at Muzaffargarh

HRF at Quetta

HRF at Muzaffargarh

In order to supplement and ensure effective emergency/disaster response capacity, a warehousing network called "Humanitarian Response Facilities" (HRF) has been initiated under a joint collaboration project between NDMA and WFP. There are seven strategically identified locations across the country i.e., Lahore & Muzaffargarh (Punjab), Quetta (Balochistan), Hyderabad (Sindh), Peshawar (KP), Gilgit (GB), Muzaffarabad (AJK), Sukkur (Sindh) and Islamabad. Presently HRF's at Muzaffargarh (Punjab) and Quetta, (Balochistan) are nearing completion, while other locations are under different stages of their pre-construction processing. As a sequel to this project, installation of 36 flosspans have been completed by 2013 while 24 flosspans for year 2014 have also been planned, this will be installed after mutual consultations between the stakeholders for more accurate and suitable future deployment of this facility.

SOFTWARE SOLUTIONS BY IT SECTION

NDMA IT Section is working to improve the efficiency of information system to ensure availability of timely data to provide an insight NDMA activities to all stakeholders. The IT section is constantly developing state of the art solutions such as; **Intranet Information System (IIS)** Intranet Information System (IIS) is developed by the IT team by using open source software for internal use of NDMA.

GUI Intranet Information System (IIS) System

The intranet of NDMA comprises following sections Communications, Archives, Trainings/Research Environment, Historical Data and NDMA Document Templates. Additionally it has a notice board for important organization wide memos and an internal contacts directory.

SMS Alert System: An SMS Alert System developed in house by NDMA IT team to leverage coordination within NDMA staff normally during day-to-day working and in emergency situation has also been put to use.

GUI SMS Alert System

• **New Website of NDMA:** The new website was developed to make it easier for a general audience to access information.

www.ndma.gov.pk

Disaster Management Information System for Pakistan NDMA is currently working on DMIS which is a Management System equipped with GIS & other related tools for Pakistan to improve emergency response system within the country. With its deployment, NDMA will be able to establish a state of the art Disaster Management Information System in Pakistan. This system is currently undergoing feasibility studies through ICT R&D.

NDMA LOGISTICS PREPAREDNESS INITIATIVES

NDMA Logistics Section is working to implement and supervise all logistics activities to ensure a befitting logistics response in case of any calamity in the country. Under its preparedness initiatives, this section is ensuring inventory management, strategic stock deployment, and management of warehouses including enhancement and maintenance of existing storage facilities.

Enhancement of Stock Storage Capacity and Strategic Deployment of Critical Relief Stocks

With the assistance and collaboration of Army & WFP, NDMA enhanced the relief stock storage capacity across the country under temporary and fixed warehouses facilities. Consonant to this, WFP, apart from rendering storage facility in their warehouse at PirPiai and Sukkur, also installed 2 Rub Halls at CMT & SD Golra, Rawalpindi to accommodate NDMA relief stocks, while Army provided storage facilities to house the additional relief stocks in their Central Depots / warehouses across the country and also provided space for installation of Rub Halls/ Flospans. NDMA also ensured strategic deployment of newly procured critical relief stocks at Karachi, Sukkur, Quetta, Lahore, Rawalpindi, Islamabad and PirPiai warehouses, while re-deployment/re-shifting of relief stocks was also carried out locally.

Repair and Maintenance of Rub Hall Facilities

With the assistance of WFP, a process of repair and maintenance of installed Rub Hall facilities at H-11 and Golra warehouses Islamabad / Rawalpindi was initiated to strengthen the storage facilities and preserve the stocks against any external environments/atmosphere.

New Structuring of NDMA Logistics Stock Inventory Management System

To have a clear visibility of available NDMA logistics stocks (mainly relief & rescue items) and ensure better management, a new format of NDMA logistics stock for inventory management system has been structured that will supplement the stock ledger maintenance system. The system ensures data information of the available stock items, their capacity, location and load tables (in terms of weight, volume & capacity) for stock carriage by compatible means of transportation.
