

10 February, 2026

Heavy Rainfall Forecast in South Chile

Valid: 10 – 12 February 2026

Affected Areas

South Chile — including Los Ríos Region, Los Lagos Region (Valdivia, Puerto Montt), and adjacent southern coastal and inland areas.

Hazard Types

Heavy Rain, Showers, Localized Flooding Potential

Hazard Summary

Forecast models indicate enhanced rainfall activity over South Chile from 10 Feb to 12 Feb, with moderate to heavy showers and embedded convection likely across the Los Ríos and Los Lagos regions. These conditions may lead to localized flooding, water accumulation in low-lying areas, and disruption to transport or outdoor activities.
