Rain and Snowfall in Türkiye

Affected Areas

Istanbul, Bursa, Balıkesir, İzmir, Aydın, Muğla, Denizli, Uşak, Afyonkarahisar, Isparta, Antalya, Konya, Karaman, Alanya, Fethiye, Finike.

Duration

February 05, 2026 – February 11, 2026

Hazard Types

Rainfall, Heavy Snowfall, Freezing rain

Hazard Summary

Moisture-laden winds are expected to enter from eastern Türkiye, initially bringing intense rainfall to the eastern regions before gradually spreading across the country. Over the coming days, widespread precipitation is forecast, including rain, snowfall, and periods of freezing rain across Türkiye. Travel disruptions and hazardous road conditions are likely, particularly in higher elevations and northern areas.
