

May 21, 2025

Low Pressure System – Bay of Bengal

Affected Areas

Bay of Bengal

Duration

May 21 - May 26, 2025

Hazard Types

Tropical Storm

Hazard Summary

An upper air cyclonic circulation that was located over the west-central Bay of Bengal, adjoining south Andhra Pradesh and north Tamil Nadu, has now shifted inland and is situated over central parts of Andhra Pradesh and adjoining southern Telangana. Significant convective activity is ongoing over the west-central Bay of Bengal, the Andaman Sea, and the northern Bay of Bengal. Additionally, isolated areas in the remaining parts of the Bay are experiencing low to moderate convection.
