

Australia: High temperatures

High temperatures are expected to persist across the northeastern Northern Territory until at least October 9. Daytime high temperatures of 36-44 C (97-111 F) and nightly lows of 21-25 C (70-77 F) are expected.

Severe heatwave warnings (the middle level on a three-tier scale) for portions of the Daly and Tiwi districts. Extreme hot conditions are expected in sections of the western Top End. Severe to low-intensity heatwave conditions are expected for the remainder of the western Top End, including the Tiwi Islands.
