

# **SUPPLEMENTARY MONSOON CONTINGENCY PLAN**

**APRIL 2009**

**NATIONAL DISASTER MANAGEMENT AUTHORITY**

## **SUPPLEMENTARY MONSOON CONTINGENCY PLAN-09**

**(TO BE READ IN CONJUNCTION WITH NDMA MONSOON CONTINGENCY PLAN-08)**

1. **General.** The peculiar geography, hydrology and the monsoon phenomena, make Pakistan extremely vulnerable to seasonal flooding which has been the most frequently recurring natural disaster in the country. Over the past six decades, floods have cost more than US \$ 5 Billion in economic damages besides causing loss of over 6,000 lives. Emerging weather pattern has further compounded the issue with increased flash flooding in semi-mountainous and mountainous regions and a surge in sea based cyclones. Relative un-preparedness for these hazards has caused significant losses. The latent socio-economic poverty and low disaster awareness levels, more so in the rural regions, declining environmental health, inability to factor risk reduction in development practices, and poor state of disaster preparedness tend to exacerbate the impact of these disasters.

2. The above factors necessitated adoption of a holistic and a well coordinated approach to deal with floods / flash floods in the country in order to minimize economic and human losses for sustained development in the country. In the same context, last year, NDMA initiated a process of consultation with all stakeholders and formulated 'Monsoon Contingency Plan-April 08' The plan undertakes an in depth Hazard Context Analysis, delineates roles and responsibilities of existing Flood Management structure in the country, works out possible Scenarios and conducts a detailed resource mapping at provincial level. It may be mentioned that vulnerability of District Dera Ghazi Khan / Rajanpur and District Peshawar to flash floods (which occurred in August 08) had already been visualized in the relevant sections of the said plan. In accordance with prevalent international practices, 13-15 % of the disaster affected population has been assumed to be in need of relief assistance.

3. A detailed forecast for 'Monsoon-09' is expected to be released by Pakistan Meteorological Department (PMD) by first week of June-09. However, its preliminary assessment for the current year, suggests the following:-

- a. Normal to above normal monsoon rains in the country.
- b. Heaviest snowfall in the past five years in northern regions of the country, thus possibility of:-
  - (1) Early flooding of western rivers (Kabul, Swat etc) as a result of rise in temperature in May-09.
  - (2) Flash floods and land sliding in the vulnerable areas.

4. **Aim.** To carry out review of 'Monsoon Contingency Plan-April 08' in light of preliminary monsoon forecast with a view to updating the plan for coordinating efficient flood management by all stakeholders.

5. **Scope.**

- a. Review of availability / utilization of flood mitigation funds.
- b. Review progress of ongoing flood mitigation projects.
- c. Review of risk analysis in light of preliminary forecast.
- d. Updation of resource mapping.

6. Based upon the dynamics and contributing factors, exacerbating vulnerability to floods in the country, 'Monsoon Contingency Plan-08' (available at [www.ndma.gov.pk](http://www.ndma.gov.pk)) was formulated after excessive consultations with all the stakeholders. The plan provides detailed framework / guidelines for instituting an efficient mechanism for management of flood / monsoon related emergencies in the country. The framework / guidelines remain in force for all response agencies in relation to progress on various flood mitigation projects, monsoon forecast and the available resources at various tiers. Disaster Management Organizational Structure is at Annex A. The current status/update of these variable aspects is covered in the succeeding paragraphs.

7. **Flood Mitigation Projects- FY 2007-08**

a. **Allocation**

Ser	Province / Executing Agency	No of Projects	Allocation (M)	Actual Releases (M)
(1)	Punjab	11	489.807	432.003
(2)	Sindh	06	489.490	244.745
(3)	NWFP	09	203.095	101.550
(4)	Balochistan	17	122.400	61.200
(5)	FATA	09	35.814	22.950
(6)	Northern Areas	05	30.30	15.150
<b>Total</b>		<b>57</b>	<b>1,370.906</b>	<b>877.598</b>

- b. **Projects.** List indicating progress on various flood mitigation projects under PSDP 2007-08 is at Annex-B. A number of projects have either been completed or are nearing completion. However, progress on a significant number is far from satisfactory. The relevant authorities / departments are required to put in concerted and coordinated efforts to ensure that these are completed as early as possible.

8. **Flood Mitigation Projects-FY 2008-09**a. **Allocation**

Ser	Province / Executing Agency	No of Projects	Allocation (M)	Actual Releases (M)
(1)	Punjab	04	382.500	-
(2)	Sindh	01	263.500	131.750
(3)	NWFP	06	93.500	46.750
(4)	Balochistan	18	68.000	-
(5)	FATA	03	25.500	-
(6)	AJ&K	03	8.500	-
(7)	Northern Areas	02	8.500	-
<b>Total</b>		<b>36</b>	<b>850.00</b>	<b>178.500</b>

- b. **Projects.** Details of ongoing and outstanding projects are at Annex–C and D respectively. In view of the paucity of time before the onset of Monsoon Season, it is imperative for the concerned stakeholders to pay special attention for completion of these projects by 30 June 09 in order to achieve desired benefits / protection during the monsoon season.

9. **Possibility of Early Flooding.** Due to heavy snowfall in the northern regions of the country during the last winters (maximum in past five years), there is a likelihood of flooding in Kabul and Swat river systems due to rise in temperature during May 09. This necessitates initiating requisite measures to prevent loss of life and property, including priority completion of related flood mitigation projects along these rivers. Moreover, the increased inflow of water in major reservoirs also needs to be taken into consideration while managing water levels at Tarbela and Mangla Dams to prevent peak synchronization during monsoon rains.

10. **Review of Flood Coordination Meeting-08.** Last NDMA Flood Coordination Meeting was held on 3 May 08. After detailed deliberations during the meeting, specific instructions were issued to concerned authorities / departments for compliance as part of flood mitigation / preparedness measures. Details are as under:-

- a. **Unauthorized Development on Flood Plains.** The rapid urbanization has resulted in unauthorized development activities on the flood plains which cause lot of damage to lives and property during flood season. The concerned regulatory authorities were tasked to strictly prevent such activities and initiate requisite mitigation / preparedness measures to prevent damage to the existing dwellings in the flood plains. However, no significant progress in this regard has been reported as yet.

- b. **Survey of Road Bridges.** National Highways Authority (NHA) was asked to conduct a survey of all road bridges over major waterways, falling on NHA road network to identify any weak areas requiring maintenance. This would preclude any chances of disruption of road communication due to excessive floods. Confirmation in this regard is still awaited from NHA.
- c. **Survey of Railway Bridges.** Similarly, Pakistan Railways was required to conduct survey of all important railway bridges. However, no progress / confirmation by the Railway Authorities has yet been received.
- d. **Urban Flooding.** All major cities of the country (Karachi, Lahore, Rawalpindi, etc) are highly vulnerable to urban flooding during heavy rains / downpour due to obsolete / inadequate drainage system. It has also been observed during the past that people living in the low lying areas faced difficulties and misery because of broken / overflowing of sewerage lines or insufficient / functioning of pumping equipment. The respective city district governments were required to put in concerted efforts in this regard to prevent disruption of routine activities in the cities during monsoon. However, no meaningful progress has been reported as yet.
- e. **Procurement of Flood Relief Equipment / Boats (OBMs).** Sequel to the last Flood Coordination Conference held on 3 May, demand for additional flood relief equipment / boats were forwarded to Provincial Disaster Management Authority (PDMA) Punjab by Headquarters Engineers 2 Corps (Details at Annex-E) and Headquarters Engineers 31 Corps on 17 November 08 and 1 January 09 respectively. However, no progress on this aspect has so far been reported by the concerned PDMA.

#### 11. **Sectoral Tasks / Responsibilities**

- a. **Ministry of Health.** Health response plans at national and provincial level are to be coordinated besides building of adequate reserves of medicines/anti snake viles at the respective levels. Capacity for provision of field hospitals, self contained small medical teams and well equipped blood banks during any disaster situation needs to be developed at priority. Ministry of Health is also required to nominate a Focal Person for health preparedness and response.
- b. **Emergency Relief Cell (ERC).** Augmentation of existing stocks of relief items, through priority procurement is necessary to meet heavy demands

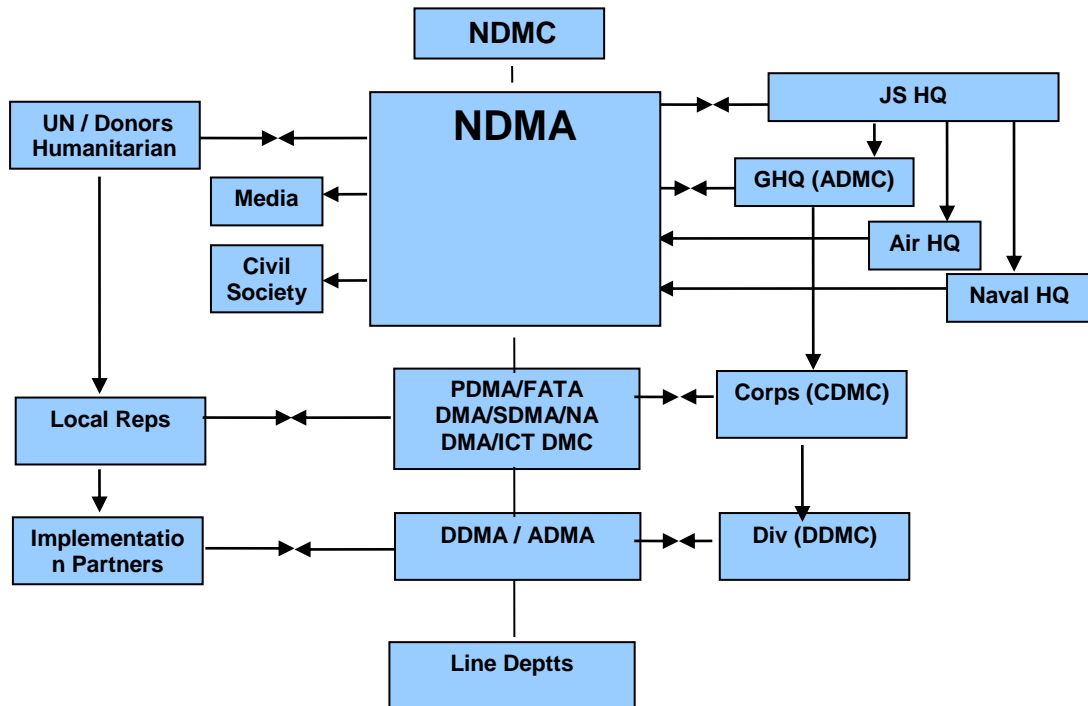

caused by the floods. A rationalized storage pattern is critical to achieve balance in readiness posture.

- c. **National Logistics Cell (NLC)**. NLC being the overall logistics coordinator on behalf of NDMA needs to evolve a comprehensive Disaster Management Logistics Plan to address the complete spectrum of transportation of relief goods across the country, using integral resources, railways, air and hired transport.
- d. **Utility Stores Corporation (USC)**. Services of USC in provision of food items to the flood affectees are of vital importance. Delivery of composite Family Ration Packs, Ready to Eat Meal and other food items through its outlets at short notice is main task for the organization.
- e. **Federal Flood Commission (FFC)**. Ensure efficient management of in/ out flow at Tarbela and Mangla to prevent peak synchronization with monsoon rains in consultation with Pakistan Meteorological Department (PMD).
- f. **Pakistan Meteorological Department (PMD)**.
  - (1) Initiate timely early warnings / weather forecasts to all stakeholders for flash floods in vulnerable regions.
  - (2) Close monitoring of catchment areas of major water reservoirs / rivers and issue of requisite early warnings.
  - (3) Issue timely early warning on unusual high snowmelt due to sudden rise in temperature and its possible flood impact implications
  - (4) Initiate early warning for any impending tropical cyclone to safeguard vulnerable communities
- g. **Provincial Irrigation Departments**. Ensure identification of vulnerable flood protection sites and initiate appropriate remedial measures to prevent failure.
- h. **Provincial Governments**. To undertake followings actions:-
  - (1) Institute integrated planning with regards to search and rescue, provision of food / potable water, shelter health care, livestock support to the flood affectees in the event of an emergency.
  - (2) Update provincial plans for early restoration of severed communication infrastructure (road, rail and telephone) and civic services.

12. **Inventory of Relief Items.** Details of relief items held in stock at various tiers are at Annex-F and G respectively. Requisite measures have been initiated to build stocks of relief items at the federal level. However, concerned authorities at the provincial level are required to pay particular attention to procure and maintain adequate relief items in stock for ensuring provision of prompt relief in the event of a disaster situation.

13. The efficacy of response is not merely dependent on availability of human and material resources. To a large extent, timely initiation of mitigation and preparedness measures determine success of response effort. In this context, quality and quantity of rescue and relief at local level will set the pace for all restorative initiatives. To meet the case, the disaster management stamina at provincial/district levels and equivalent demands immediate up gradation. The wherewithal in federal ministries / provincial departments also needs matching capabilities. A synergized effort is required to confront the looming challenges.

## DISASTER MANAGEMENT ORGANIZATIONAL STRUCTURE

Acronyms	
NDMC	- National Disaster Management Commission
NDMA	- National Disaster Management Authority
ADMC	- Army Disaster Management Cell
CDMC	- Corps Disaster Management Cell
DDMC	- Division Disaster Management Cell
PDMA	- Provincial Disaster Management Authority
SDMA	- State Disaster Management Authority
NADMA	- Northern Area Disaster Management Authority
ICTDMA-	Islamabad Capital Territory Disaster Management Cell
