Global Alerts - East Zone

Heavy Rainfall/Snowfall - ASEAN Countries

Affected Areas

Malaysia: East coast of Peninsular Malaysia (Kelantan, Terengganu, Pahang).

The Philippines: Eastern and central regions, particularly Visayas and Mindanao.

Duration

January 8-10, 2025

Hazard Types

Flooding: Urban, flash, and riverine flooding in low-lying and coastal areas.

Landslides: In hilly and mountainous terrain

Hazard Summary

Heavy rainfall from December 27th to January 2nd is expected to impact, **Malaysia**, and **the Philippines**, causing **flooding**, **landslides**, and **rough seas**. Low-lying and coastal areas face flooding risks, while hilly regions are prone to landslides. Coastal zones, especially along the **east coast of Malaysia**, and **eastern Philippines**, will experience rough seas, posing dangers to small boats. Residents should stay vigilant and follow local advisories.
