

Forest Fire Update - Qingxin District, China

Location: Qingxin District, China

Hazard: Forest Fire

Intensity: Extreme

Expected Time of Occurrence: December 23 to December 28, 2024.

Expected Weather Conditions: Dry weather conditions with moderate temperature and low humidity levels.

Hazard Summary:

A **Forest Fire Red Warning** is in effect for Qingxin District from **December 23–28, 2024**, with extremely flammable conditions and a high risk of rapid-fire spread. Mild, dry weather with no significant rainfall will exacerbate the risk. Authorities and residents must strictly avoid activities that could ignite fires and remain vigilant.
