

Jan 28, 2026

## Rain and Snowfall across Spain

## Affected Areas

Madrid, Castilla-La Mancha, Castilla y León, Extremadura, Andalusia, Valencia.

## Duration

January 28 – February 1, 2026

## Hazard Types

Heavy Rainfall. Thunderstorms. Heavy Snowfall. Strong Winds

## Hazard Summary

Unsettled weather is affecting large parts of central, western, and southern Spain, including Madrid, Castilla-La Mancha, Extremadura, and Andalusia. Periods of strong winds and precipitation are creating variable conditions, with locally stronger impacts in southern and eastern areas such as Valencia. These conditions may cause minor disruptions to travel and outdoor activities.
