

Jan 27, 2026

## Heavy Rain and Snowfall across Ireland and United Kingdom

### Affected Areas

South Wales, England (Southampton, Exeter, Plymouth, Oxford, Leeds, Manchester, Durham), Scotland (Edinburgh, Glasgow, Aberdeen, Dundee), Ireland (Dublin, Greystones, Arklow, Newcastle west)

### Duration

January 27 - February 1, 2026

### Hazard Types

Heavy Rain, Coastal Flooding, Storm surges, Heavy Snow, Freezing rain

### Hazard Summary

Due to low pressure system in the Atlantic Ocean, a cyclone developed in the south-west of Ireland and United Kingdom (UK) has diverted the moisture carrying winds which is expected to bring heavy rainfalls in the southern parts of Ireland and UK, whereas freezing rain and snow is expected in the central and northern parts.
